ROYAL ROBINS

PROFESSIONAL SUMMARY

Software development professional with experience in developing and designing web applications using HTML, CSS, JavaScript, Angular, Node.js, and React. Adept at developing and deploying complex backend systems, web services and databases.

WORK HISTORY

Full Stack Web Developer, 05/2024 to Current
Free-lance - Remote

- Used Javascript, SQL and HTML to develop app-solutions.
- Increased website performance by optimizing front-end and back-end code for faster loading times.
- Created easy-to-use APIs for third-party integrations, enhancing the functionality of existing applications without compromising on performance or security.
- Applied responsive design principles to ensure consistent display and functionality across a wide range of devices, including mobile phones, tablets, and desktop computers.
- Utilized UX/UI design skills to further increase the overall aesthetic of the design while further optimizing the code for the websites.

UX/UI Designer, 12/2021 to 01/2023
Rally Marketing - Lafayette, LA

- Enhanced user experience by conducting thorough research and creating intuitive wireframes for digital products.
- Identified and addressed usability issues through heuristic evaluations, leading to product refinements that better served user needs.
- Designed engaging visuals optimized for various devices, enhancing overall user experience across platforms.
- Conducted competitive analysis to identify UX/UI trends, incorporating best practices into product designs.
- Established style guides and pattern libraries to maintain consistency throughout product interfaces and branding materials.
- Improved website conversion rates through strategic placement of call-to-action elements within UI designs.
- Developed interactive prototypes to validate designs, leading to faster iteration cycles and improved final products.
